

# Whole Sale User Manual

1. The first thing that opens is the Place order Form , here you can select the relevant Customer , select the relevant item and place and order . This process is the job of the Cashier.
2. In this Place Order Form , The first order we select can be added to Order table by the Add To Cart button , You can remove it by clicking on an Order in the table and clicking on the Clear button.
3. The manage customer information can be managed through the manage customer button in this place order form , The manage order information can be managed with the manage order button , The make payment button allows the manager to manage payments. The manager login button allows the manager to enter his username and password and manage the item and view revenue records .
